

## **Careers Education Information Advice and Guidance (CEIAG)**

Government funding for careers advice and guidance services in schools has been cut both nationally and locally. However, here at Forest we are committed to providing the highest level of support to our students, ensuring that they have all the necessary information to make an informed choice for their Post 16 destination. Support is tailored to the needs of each individual student.

The provision provided at Forest is significantly above most secondary schools across the country. This has resulted in the school being well above the national average on the Gatsby Bench Marks, which is how careers provision is now judged within schools.

At Forest we fully appreciate the need for a comprehensive careers programme. Our aim will always be to provide the highest level of advice and guidance for our students so that they can be confident in their future options and will leave Forest with a clear and realistic career plan.

Any pupil in any year group is very welcome to drop in for a chat with Mrs Mulligan in the Transition Office at the back of the library at any time – tutor time being a good time so as not to miss lessons. If your son would like careers advice and you would like to join the discussion please contact Mrs Mulligan for any appointment,
